React Frontend Developer

alimehroz621@gmail.com

297 H-Block Johar Town, Lahore

SUMMARY

I'm a passionate React Frontend Developer with real-world experience building responsive, scalable web applications using React and Redux. I enjoy turning UI/UX designs into clean, functional interfaces and thrive on creating smooth user experiences. I'm confident working with state management and API integration using Axios, and I'm always looking for opportunities to grow, collaborate with talented teams, and take on new frontend challenges.

SKILLS

Frontend Developer -

- React.js, HTML, CSS, JavaScript
- Responsive Web Designs
- Redux & Content API's etc.
- Bootstrap & Tailwind CSS
- User Interface Design
- Component-Based Architecture etc.

Development Tools -

- npm
- Git
- GitHub

Testing -

- Jest
- React Testing Library

Soft Skills -

- Problem Solving
- Time Management & Team Collaboration
- Communication & Customer Service

EDUCATION

PMAS Arid Agriculture University, Rwp

Bachelor's Degree in Software Engineer
2020 - 2024

PROFESSIONAL EXPERIENCE

React Frontend Developer / QA Engineer

2BVisionTechnologies | Feb 2024 - present

- Spearheading the development and testing of scalable web applications using React, Redux Toolkit, Axios, and Jest.
- Collaborated closely with cross-functional teams, focusing on performance, maintainability, and code quality.

Admin Dashboard (In Progress)

- Currently developing a fully responsive Admin Dashboard using React, Redux Toolkit, and Axios for managing user data, system settings, and analytics.
- Architecting dynamic modules for data visualization, system configuration, and secure admin-level operations.
- Integrating RESTful APIs with Redux for real-time data handling and optimized user experience.
- Ensuring component scalability with modular UI structure and responsive layout.

TaskFlow Application

- Developed a Trello-like task management app using React, Redux Toolkit, and Axios.
- Implemented features like boards, folders, and task creation.
- Designed task status indicators (Pending, Active, Complete, Delete) with real-time UI updates.
- Enabled secure and scalable RESTful API interaction with Axios.
- Wrote unit and integration tests using Jest, ensuring robust, regression-free code.

MySocial Application

- Contributed to the frontend of a social networking app using React and RESTful APIs.
- Built UI components for user posts, feeds, and interactions with dynamic rendering.
- Participated in UI/UX enhancements and manual testing to improve usability and performance.
